BACKGROUND

Cyber Security student at BINUS University with a strong foundation in algorithmic problem solving and web exploitation. Active CTF competitor with practical experience in vulnerability research and technical writing. Experienced in intensive technical training environments, covering full-stack development and low-level programming in C and Java.

EXPERIENCE

Binus Lab Assistant | Trainee

Oct 2025 - Dec 2025

- Streamlined complex backend logic for full stack applications using React and NestJS, delivering production-ready modules to senior evaluators.
- Completed a high intensity 420 hour technical bootcamp (14 hours/day), mastering advanced Algorithm Design with C, Java (OOP), SQL, Web Design, and Web Programming.
- Successfully developed a working social media platform from scratch and passed the technical review by senior trainers with a focus on core software development skills.

Binus Cyber Security Community | Asst. Koordinator

Feb 2025 - Nov 2025

- Simplified complex cybersecurity topics into easy to understand learning materials for over 100 community members.
- Authored 5 technical articles and reports on emerging malware and zero-day vulnerabilities, helping readers to stay informed about the latest cyber threats.
- Led internal coordination for security workshops, resulting in a more structured flow of information and higher engagement within the community

CYPHER 2025 | Partnership Relations

Aug 2025 - Oct 2025

- Organized and led a CTI Group networking event for 50 students, facilitating insights into real world industry practices and collaboration with corporate experts.
 - Managed partnerships with 10+ student organizations and media partners to coordinate promotion and drive campus wide visibility.
 - Secured 100% registration capacity within the first week, managing all enrollment workflows for 50 participants.
-

CERTIFICATIONS

Fortinet Certified Fundamentals (FCF) - Cybersecurity

Jul 2026

ACTIVITIES

CTF Contest 2025, BINUS University Competition

Jun 2025

- Competed as part of the BINUS team in a university-wide CTF, solving technical challenges across Web Exploitation, and Forensics.

COMPFEST Competition, National Competition

Aug 2025

- Competed in the CTF category, focusing on Cryptography and Web Exploitation challenges.
-

PROJECT ACTIVITIES

Social Media Content Platform (Full Stack Project)

Dec 2025 – Jan 2026

- Developed a full-stack social media prototype using React and NestJS with Prisma ORM.
 - Implemented secure user authentication and authorization using JWT.
 - Applied the Levenshtein Distance algorithm for user search and Multer for multimedia handling.
-

EDUCATION

Binus University | Bachelor of Computer Science (Cyber Security) | GPA: 3.63/4.00

Aug 2024 - Present

Relevant Coursework:

- Network Penetration Testing, Mobile Penetration Testing, Software Security, Server and Network Administration, Cyber Law, Algorithm Design & Analysis.

Technical Skills:

C | Java | JavaScript | Web Exploitation | Linux Environment | Git | Networking Fundamentals | Technical Writing
